

Head Wrap

Innovative and Non-Invasive Temperature Control

THE HEAD WRAP IS AN INNOVATIVE METHOD OF CONTROLLED HEATING & COOLING FOR THE BRAIN.

- Unique design allows for easy access to the head and neck area
- One size fits most patients, with adjustable Velcro® flaps
- May provide whole body cooling for patients who require mild hypothermia
- Can help maintain normothermia

The Head Wrap was developed to provide uninterrupted therapy throughout a variety of procedures. It offers an innovative, non-invasive method of controlling core body temperature by cooling/heating the major blood supply to and from the brain. It is an alternative to ice or ice packs and its versatile design provides therapy in a wide variety of clinical situations.

Cincinnati Sub-Zero has been managing your patient temperature needs for over 45 years.
